Ceramic fiber blanket is high strength, needled insulating blanket that is made from ceramic fiber bulk. The combination of long spun fibers and needling operation produce tough, resilient and strong blankets, which resist tearing both before and after heating.Ceramic fiber blanket is completely inorganic and available in a variety of temperature grades, densities, and sizes.

Ceramic fiber is a lightweight insulating material known for its excellent thermal resistance, low thermal conductivity, and resistance to thermal shock. It has various industrial applications, including in the aerospace, metallurgy, petrochemical, and manufacturing sectors. The ceramic fiber market has witnessed steady growth due to its versatility and use in a wide range of industrial applications. It is used for insulation, lining, and fireproofing in industries such as steel, petrochemical, glass, and foundries.Energy efficiency and sustainability are crucial factors driving the adoption of ceramic fiber materials. These materials are used in industrial furnaces, kilns, and thermal equipment to improve energy efficiency and reduce heat loss. The aerospace and automotive industries use ceramic fiber materials for thermal insulation and lightweight components. As these industries continue to advance, the demand for ceramic fiber products may increase.
