## Abstracts

The global Fireproof Particleboard market size is expected to reach \$ 7635.5 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

The fireproof particleboard market is a niche segment within the broader wood-based panel industry, specializing in the production and distribution of particleboard with enhanced fire-resistant properties. These specially engineered boards are in high demand for applications where fire safety is paramount, such as commercial and public building construction. The market has witnessed steady growth due to increasingly stringent building codes and regulations, coupled with a growing emphasis on fire prevention and safety. Fireproof particleboard manufacturers leverage advanced production techniques, including the use of fire-resistant additives and coatings, to create boards that resist combustion and slow the spread of flames. Market growth is also driven by the rising awareness of the importance of fire-rated materials in ensuring the safety of people and property in the event of a fire. As a result, the fireproof particleboard market continues to expand to meet the demands of fire-conscious industries and construction projects.

Fireproof particleboard, also known as fire-rated particleboard, is a specialized type of particleboard that has been engineered to resist combustion and meet certain fire safety standards. It is typically made by incorporating fire-resistant additives or using fire-rated coatings during the manufacturing process. These additives and coatings provide the particleboard with enhanced fire-resistant properties, reducing its susceptibility to ignition and slowing down the spread of flames. Fireproof particleboard is used in applications where fire safety is a primary concern, such as construction of fire-rated doors, wall panels, and furniture in commercial and public buildings. This type of particleboard contributes to fire protection by helping to prevent the rapid spread of fire

and providing valuable time for evacuation or firefighting efforts in emergency situations.
