Abstracts

Firewall services help businesses in protecting end-to-end database and web application. The growth of NGFW (next-generation firewall) has completely changed the scene with features such as application programming interface (API), deep packet inspection (DPI), intrusion prevention system (IPS), and filtering, developing the opportunities in the firewall market. In recent years, firewall devices have gained an element of importance in network security, based on the progress in product design in terms of performance, sophistication, and functionality.

Scope of the Report:

This report studies the Firewall as a Service market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Firewall as a Service market by product type and applications/end industries.

North America is likely to have the highest market share during the forecast period, due to the growing adoption of cloud services, increasing need to prevent cyber threats, and better security compliant offerings by sellers.
