Abstracts

The global Fishing Clothing market size is expected to reach \$ 1781.6 million by 2029, rising at a market growth of 6.3% CAGR during the forecast period (2023-2029).

Whilst having the right kit is essential for any good angler, some would say the most important element is the clothing that they wear. There is a reason that people have a traditional image of a fisherman in a woollen sweater, waxed raincoat and wellington boots, despite there being no actual uniform. Fishing clothing needs to be comfortable, waterproof and warm enough to offer protection against the elements during your time at the water's edge.

This report studies the global Fishing Clothing demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Fishing Clothing, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Fishing Clothing that contribute to its increasing demand across many markets.
