Abstracts

The global Fixed Lighthouse market size is expected to reach \$ 2350.3 million by 2029, rising at a market growth of 7.5% CAGR during the forecast period (2023-2029).

Fixed Lighthouse usually refers to a lighthouse structure that is fixed on the ground or buildings to indicate the position of ships, ships or aircraft. Unlike traditional lighthouses, it does not rotate or shake, but emits beams of light around it in a fixed direction and angle. Fixed lighthouses are usually used to indicate the passage of navigation or to warn of dangers, such as reefs, shoals or other obstacles. Stationary lighthouses usually consist of powerful lights and beams to provide sufficient navigational information in dark or adverse weather conditions to ensure ships and ships can navigate safely.
