The global Fixed Linear Resistor market size is expected to reach \$ 484.9 million by 2029, rising at a market growth of 5.2% CAGR during the forecast period (2023-2029).

Fixed linear resistors are the resistors whose resistance does not change with the change in voltage or temperature. A fixed resistor does not vary its resistance value, either by design or in response to the environment around it. Whether a circuit needs precision, high power capacity or a combination of both, the fixed resistor is a vital component in every electronic design.

This report studies the global Fixed Linear Resistor production, demand, key manufacturers, and key regions.
