Fixed pool lifts are mechanical devices designed to assist individuals with mobility impairments in entering and exiting swimming pools safely and easily. These lifts are typically mounted on the deck of the pool or fixed to the side of the pool structure. They consist of a chair or platform that can be lowered into the water, allowing the user to sit down at deck level, then be lifted over the edge of the pool and lowered gently into the water. Once in the water, the lift can raise the user back up to exit the pool.
