## Abstracts

The global Fixed Satellite Service market size is expected to reach \$ 16460 million by 2032, rising at a market growth of 1.8% CAGR during the forecast period (2026-2032).

An FSS is a type of service that uses geosynchronous satellites to broadcast through TV and radio, telecommunications, and satellite communication that are used by governments, military organizations, small and large enterprises, and other end-users. It can provide information to intelligence and security organizations. FSS is classified into wholesale services and managed services. The satellites used for FSS have low-power output and require larger dish-style antennas than direct broadcasting satellites. FSS works with bands such as C-band, Ku-band, and Ka-band.

For industry structure analysis, the Fixed Satellite Service industry is relatively concentrated. These players usually are large multinational corporations owned by business giants or national governments. The top five players include SES, Intelsat, Eutelsat Communications, Telesat and SKY Perfect JSAT, account for about 60% of the revenue market. Europe occupied 26% of the market. It is followed by North America and Asia (Excluding China), which respectively account for around 23% and 15% of the global total industry.
