A fixed skylight is a non-opening skylight primarily used for natural lighting and enhancing interior ventilation. Unlike electric or manually operable skylights, a fixed skylight cannot be moved once installed. Its main purpose is to bring in natural light, improving indoor lighting conditions and creating a sense of space. Fixed skylights are commonly used in residential, commercial buildings, and museums, particularly in areas that do not require or cannot accommodate ventilation. They are typically made from transparent or translucent materials, such as glass or acrylic, offering excellent weather resistance and insulation properties, effectively blocking external climatic influences while providing lasting light.
