## Abstracts

The global Fixed-wing Rescue Drone market size is expected to reach \$ 1224 million by 2032, rising at a market growth of 12.5% CAGR during the forecast period (2026-2032).

In 2025, global Fixed-wing Rescue Drone production reached approximately 13,684 units, with an average global market price of around US\$ 38,000 per unit.

The gross profit margin of major companies in the industry is between 25% – 45%.

In 2025, the global production capacity of fixed-wing rescue drone was approximately 18,245 units.

Fixed-wing Rescue Drones are unmanned aerial systems designed for search, rescue, emergency response, disaster assessment, and long-range monitoring missions. Compared with multirotor drones, fixed-wing platforms generally offer longer endurance, wider coverage, higher cruising efficiency, and better suitability for large-area search operations. They can carry cameras, infrared sensors, communication relay modules, positioning payloads, loudspeakers, and emergency supply pods. These drones are used in mountain rescue, flood monitoring, maritime search, forest fire patrol, earthquake assessment, border rescue, and emergency communication support, helping responders improve situational awareness and reduce response time.

The industrial chain of Fixed-wing Rescue Drones covers upstream airframe materials, motors, batteries, flight controllers, navigation modules, communication systems, cameras, infrared sensors, payload mounts, and ground control equipment. The midstream includes aircraft design, aerodynamic optimization, avionics integration, payload configuration, software development, assembly, testing, and flight verification.

Downstream applications mainly include emergency rescue agencies, fire departments, public safety units, maritime rescue, disaster monitoring, forestry patrol, mountain rescue, and humanitarian relief. Related services include pilot training, mission planning, maintenance, data processing, spare parts supply, software updates, and customized payload integration.

This report studies the global Fixed-wing Rescue Drone production, demand, key manufacturers, and key regions.
