Abstracts

The global Flake Graphite market size is expected to reach \$ 1821.8 million by 2029, rising at a market growth of 17.3% CAGR during the forecast period (2023-2029).

Flake Graphite is probably the most familiar of the natural graphite materials. Most people are familiar with the finely powdered graphite used as a lock lubricant, or the “lead” in pencils. Both of these products typically contain flake graphite. As the name implies flake graphite has a distinctly flaky or platy morphology. All graphite has a flaky morphology on some level, but in most instances flake-graphite has this structure regardless of particle size. Haida Graphite is the largest manufacturers of Flake Graphite in the world, has a share about 30.24%. Other players include Syrah Resources, Northeast Asia Mineral Resources, BTR New Material Group, Superior Graphite. In terms of product type, type high purity graphite (>99.9%) is the largest segment, occupied for a share of 53.32%, and in terms of application, application refractories has a share about 38.11 percent.

This report studies the global Flake Graphite production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Flake Graphite, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
