Abstracts

The global Flake Silver Powder and Spherical Silver Powder market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Flake silver powder is used as the raw material of the back silver paste, which can reduce the cost of the silver paste while maintaining a low resistivity. However, due to the poor fluidity of the prepared silver paste, it cannot be used for the front silver paste with extremely fine grid lines. electrode.

Spherical silver powder has a high degree of sphericity, and the silver paste prepared from spherical silver powder has good fluidity and can pass through the positive electrode fine grid line better. The properties of spherical silver powder can meet the demand of positive silver paste for silver powder.

This report studies the global Flake Silver Powder and Spherical Silver Powder production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Flake Silver Powder and Spherical Silver Powder, and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
