Abstracts

Flame retardant apparel is a type of protective clothing, which is a part of PPE for industrial workers. This type of apparel protects workers against certain hazards such as arc flashes, fire flashes, and explosions.

Scope of the Report:

This report focuses on the Flame Retardant Apparel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The industries segment dominated the flame retardant apparel market and is expected to continue its dominance over the next four years. The increased usage of fire retardant coveralls in industrial operations coupled with the fast expansion of certain end-user industries such as construction, manufacturing, and aerospace will propel the growth of this market segment.

In terms of geography, the Americas led the fire resistant clothing market and is foreseen to continue the domination during the forecast period. The growth of different industrial segments and the rise in defense spending will drive the growth of the market in the region. Moreover, the increase in the automotive production will also augment the growth of the flame retardant apparel market in the Americas.

The worldwide market for Flame Retardant Apparel is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
