## Abstracts

According to our (Global Info Research) latest study, the global Flange Connector market size was valued at US\$ 5662 million in 2025 and is forecast to a readjusted size of US\$ 9610 million by 2032 with a CAGR of 8.1% during review period.

A flange connector is a mechanical component used to join pipes, valves, pumps, and other equipment in a piping system. It provides a secure, leak-proof connection that can be easily assembled or disassembled for maintenance. Flange connectors are typically made of carbon steel, stainless steel, alloy steel, or plastic and are widely used in industries such as petrochemical, energy, shipbuilding, construction, and industrial manufacturing. In 2025, global flange connector production reached approximately 45.83 M units, with an average global market price of around US\$ 120 per unit. Annual production capacity is 50 M units. Gross Profit Margin: 25%. The industry chain of flange connectors is structured across upstream raw materials, midstream manufacturing, and downstream end-use industries. Upstream mainly involves steel (carbon steel, stainless steel, and alloy steel) and surface treatment materials such as galvanizing or anti-corrosion coatings. Midstream covers processing and manufacturing including forging, welding, machining, and quality testing, with some companies offering customized products for specific pressure ratings or standards. Downstream applications span petrochemical, energy, shipbuilding, construction piping, and industrial equipment, all requiring high reliability and safety. The flange connector market benefits from steady demand driven by industrial infrastructure expansion, energy projects, and equipment upgrades. As high-pressure, high-temperature, and corrosion-resistant applications become more common, investments in material development and precision manufacturing are key to competitiveness. Companies that can offer fast customization, reliable quality certification, and adaptability to multiple industries are likely to gain a

stronger market position in the coming years.
