Abstracts

According to our (Global Info Research) latest study, the global Flash Card Reader Controller market size was valued at US\$ 123 million in 2025 and is forecast to a readjusted size of US\$ 180 million by 2032 with a CAGR of 5.8% during review period.

Flash Card Reader Controller is a dedicated interface control chip used in memory card reading devices, managing data communication between a host system and flash memory cards while supporting card detection, command control, data transfer, error handling, and stable access to SD, microSD, and other removable storage formats. In 2025, production was 100 million units and the average price was USD 1.2 per unit. The industry's capacity utilization rate in 2025 was about 70%, and the average gross margin was around 30%. Upstream, the key inputs mainly include silicon wafers, photoresists, electronic specialty gases, and packaging materials, with representative suppliers such as Shin-Etsu Chemical, JSR, and Air Liquide providing core semiconductor materials and process inputs. The midstream segment focuses on controller architecture design, memory card protocol integration, host interface adaptation, data transfer logic, signal integrity optimization, power management, firmware compatibility, wafer fabrication, packaging, testing, and reliability validation, which together determine reading stability, transfer efficiency, card compatibility, power consumption, and cost competitiveness. Downstream, Flash Card Reader Controller is mainly used in personal computers, external card readers, and docking stations, where it helps notebooks, desktops, peripheral accessories, and expansion devices provide convenient access to removable flash storage, with representative customers including Lenovo, Dell Technologies, and Anker Innovations.

Flash Card Reader Controller demand will be supported by the continued role of

removable storage in personal computers, external card readers, and docking stations. Although smartphones have reduced some consumer card usage, cameras, industrial handheld terminals, laptops, creator devices, and multi-port accessories still require stable SD and microSD access. In docking stations and compact peripherals, the controller is valued less for headline performance and more for compatibility, low power consumption, small package size, and mature driver support. Future differentiation will depend on transfer stability, multi-format card support, host interface adaptation, cost control, and reliable supply for long-tail peripheral markets.

This report is a detailed and comprehensive analysis for global Flash Card Reader Controller market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Flash Card Reader Controller market size and forecasts, in consumption value (\$ Million), sales quantity (Million Units), and average selling prices (US\$/Unit), 2021-2032

Global Flash Card Reader Controller market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Million Units), and average selling prices (US\$/Unit), 2021-2032

Global Flash Card Reader Controller market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Million Units), and average selling prices (US\$/Unit), 2021-2032

Global Flash Card Reader Controller market shares of main players, shipments in revenue (\$ Million), sales quantity (Million Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Flash Card Reader Controller

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Flash Card Reader Controller market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include FTDI (UK), Silicon Labs (USA), TI (USA), Fujitsu (Japan), Infineon (Germany), Silicon Motion (Taiwan), ASMedia Technology (Taiwan), JMicron Technology (Taiwan), WCH (China), Sage Microelectronics (China), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Flash Card Reader Controller market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

36-Pin VQFN

48-Pin VQFN

Others

Market segment by Interface Standard

USB 2.0

USB 3.0

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Flash Card Reader Controller Consumption Value by Type:
2021 Versus 2025 Versus 2032

1.3.2 36-Pin VQFN

1.3.3 48-Pin VQFN

1.3.4 Others

1.4 Market Analysis by Interface Standard

1.4.1 Overview: Global Flash Card Reader Controller Consumption Value by Interface
Standard: 2021 Versus 2025 Versus 2032

1.4.2 USB 2.0

1.4.3 USB 3.0

1.4.4 Others

1.5 Market Analysis by Data Rate

1.5.1 Overview: Global Flash Card Reader Controller Consumption Value by Data
Rate: 2021 Versus 2025 Versus 2032

1.5.2 Data Rate?480Mbps

1.5.3 480Mbps
