According to our (Global Info Research) latest study, the global Flat Elevator Traveling Cable market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The elevator traveling cable connects the elevator car to the controller. All power and signal information is transferred through the travelling cables in traditional elevators. These cables are expected to last for a long time. Elevator traveling cable is a multi-conductor wire that is always in motion. The average life expectancy is 15 to 20 years. Flat elevator cables are a practical solution to today's market demand for smaller, slimmer wires. These cables are thinner thanks to their flat structure. Flat elevator cables are ideal for scenarios requiring undetectable circuitry due to its low torque attribute and long life.
