A flat paint roller is a paint application tool used for painting large flat surfaces rapidly and efficiently. The flat paint roller typically consists of two parts: a 'roller frame,' and a 'roller cover.' The roller cover absorbs the paint and transfers it to the painted surface, the roller frame attaches to the roller cover. A painter holds the roller by the handle section. The roller frame is reusable. It is possible to clean and reuse a roller cover, but it is also typically disposed of after use.
