Abstracts

Flat panel display equipments are set of equipment used by FPD manufacturers to manufacture displays for their different product groups. For instance, Samsung uses FPD equipment to manufacture FPDs for products ranging from TVs to smartphones and tablets. The equipment includes CVD systems, sputter systems, etch and ash systems, coater and developers, and array and inspection systems.

Scope of the Report:

This report focuses on the Flat Panel Display Equipments in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Though the market is currently dominated by the LCD segment, the constantly reducing prices of OLED and the increasing demand for smartphones and tablets with active-matrix organic light-emitting diode (AMOLED) will result in increasing the shares of the AMOLED segment, which will dominate the market by the end of the predicted period. Also, the decreasing demand for PCs will further reduce the demand for LCD monitors, in turn, augmenting the shares of the AMOLED segment.

According to this market research and analysis, the consumer electronics industry will be the major end-user segment to the FPD equipment market throughout the next four years. The increasing adoption of AMOLEDs for smartphones and tablets and LEDs for TVs, will fuel the growth of the market in this segment. Furthermore, the increasing demand for high resolution and rich color quality displays and the rising demand for ultra-high-definition (UHD) LCD TVs, will also drive market growth in this segment.

The worldwide market for Flat Panel Display Equipments is expected to grow at a

CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
