## Abstracts

The global Flat Sunglasses market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Plain sunglasses are glasses whose lenses have no power and are only used to block sunlight and ultraviolet rays without correcting vision. They are designed to protect the eyes from strong sunlight and reduce UV damage to the eyes during outdoor activities. Flat sunglasses usually have UV protection to prevent UV rays from damaging your eyes, and you can choose from different lens colors and styles according to your needs. This type of sunglasses is often worn by people in driving, outdoor activities, beach, skiing and other occasions to protect the eyes and increase comfort.

This report studies the global Flat Sunglasses production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Flat Sunglasses, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2023 as the base year. This report explores demand trends and competition, as well as details the characteristics of Flat Sunglasses that contribute to its increasing demand across many markets.

Highlights and key features of the study
