## Abstracts

According to our (Global Info Research) latest study, the global Flat Top Beam Shaper market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The focusing flat-top beam shaper is used to convert a Gaussian beam into an Airy disk profile to control the intensity distribution of the laser spot. The output beam is almost 100% effectively shaped into a flat-top or circular beam profile. Focusing the beam after a flat-top beam shaper results in the loss of the flat-top profile. Focused flat-top beam shapers provide an alternative solution for obtaining flat-top beams by generating an Airy disk beam profile.
