Abstracts

According to our (Global Info Research) latest study, the global Flex Fuel Engine market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Flex-fuel vehicles are segmented in terms of engine capacity such as compact-, midsize, and full-size.

The compact-size segment had the highest market share and dominated the global market. The downsizing of several older generation engines has increased the volume units of engines falling into this segment. Several manufacturers are using technologies like forced induction and direct injection to minimize the size of vehicular engines. This not only makes the vehicle weight lighter but also reduces the friction in the engine. The increasing focus to reduce carbon emission by all major economies across the globe will be a major growth driver for this market segment.
