Flexible Diamond Polishing Pads are specialized tools used for polishing and finishing hard surfaces like granite, marble, concrete, and glass. These pads feature a diamond abrasive embedded in a flexible, often rubber-like backing, allowing them to conform to the contours of the surface being worked on. They are designed for use in both dry and wet applications, with the diamond particles providing high abrasion resistance and a smooth finish. These pads come in various grit sizes, allowing users to progressively refine the surface from coarse grinding to high-gloss polishing. Their flexibility makes them ideal for curved or uneven surfaces, offering versatility and efficiency in professional stonework and construction projects.
