Flexible Lances are long-pole tools used for painting, cleaning or spraying other substances in remote or inaccessible places. They are usually made of soft materials, such as curved plastic or metal tubes, which allow the spray gun to flexibly adjust its direction under the control of the operator. One end of the flexible spray gun is connected to a nozzle for spraying paint, cleaning agents or other liquids; the other end is controlled by the operator. They are usually used in places that are difficult to reach or require precise control, such as high-altitude operations, narrow spaces, or environments that need to prevent contamination.
