Abstracts

The global Flexible Quartz Capillary market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Flexible quartz capillary is a slender tubular structure made of quartz (silica) material, which has both flexible and capillary effects. It is usually made of high-purity fused silica, and has excellent optical, thermal and chemical properties. The main characteristics of flexible quartz capillaries include: flexibility performance: Flexible quartz capillaries have high flexibility and flexibility, and can be bent and adjusted in shape according to needs, without being easy to break or deform. This flexibility characteristic gives it advantages in applications that require complex curves, bending, or precise positioning. Capillary effect: Due to the special surface properties of quartz, flexible quartz capillaries exhibit capillary effect. Capillary effect refers to the rise and fall effect of liquid in a small diameter pipe, that is, the liquid can rise or fall in the pipe without free flow. This effect makes flexible quartz capillary very important in liquid transportation, Microfluidics and microfluidic analysis. Optical transparency: Flexible quartz capillary tubes have excellent optical transparency and can effectively transmit light. This makes it widely used in fields such as optical sensing, fiber optic communication, and optical devices. High temperature resistance: Quartz materials have excellent high temperature resistance, and flexible quartz capillaries can work in high-temperature environments without melting or damage, making them suitable for high-temperature applications and special environments. Flexible quartz capillary has been applied in many fields, including but not limited to optical fiber sensing, biochemical analysis, Microfluidics technology, chemical separation, microfluidic analysis and chromatographic analysis. Its unique flexibility and capillary effect make it have important functions and application potential in these fields.
