According to our (Global Info Research) latest study, the global Flexible Solar Cell market size was valued at USD 462.8 million in 2023 and is forecast to a readjusted size of USD 724.1 million by 2030 with a CAGR of 6.6% during review period.

Flexible Solar Cell is a kind of thin film solar cell. Flexible solar panels can, as their name suggests, flex. They are also very lightweight and these two characteristics make them useful for camping, rapid transport and deployment in emergencies, and for use on caravans, vehicles, and even airplanes. On buildings they can be applied to curved surfaces or structures where weight is an issue. As they can be glued directly to the surface, existing penetrations don't need to be used or new penetrations made.

The Global flexible Solar cell market is dominated by Uni-Solar, Miasole, Global Solar, SoloPower Systems and Flisom, with the top five players accounting for about 70% of the market share.

Uni-Solar has about 30 per cent of the market.
