Abstracts

The global Flight Control Computer market size is expected to reach \$ 885 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

The flight control computer is at the core of any modern aircraft, both manned and unmanned. In both cases the typical flight control computer drives the primary flight control surfaces to drive the flight path of the aircraft but also provides finer control for stability. Given the criticality of this function these computers are often used in a dual or triple redundant configuration and subject to strict compliance to safety standards for software and hardware such as DO-178C and DO-254.

China is the largest region of Flight Control Computer, with a market share about 35%, followed by Europe and North America, etc. BAE Systems, Thales, Rockwell Collins, Moog and Honeywell are the top 5 manufacturers of industry, and they had about 65% combined market share.

This report studies the global Flight Control Computer production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Flight Control Computer and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
