According to our (Global Info Research) latest study, the global Flight Control Computer market size was valued at US\$ 679 million in 2025 and is forecast to a readjusted size of US\$ 885 million by 2032 with a CAGR of 3.9% during review period.

The flight control computer is at the core of any modern aircraft, both manned and unmanned. In both cases the typical flight control computer drives the primary flight control surfaces to drive the flight path of the aircraft but also provides finer control for stability. Given the criticality of this function these computers are often used in a dual or triple redundant configuration and subject to strict compliance to safety standards for software and hardware such as DO-178C and DO-254.

China is the largest region of Flight Control Computer, with a market share about 35%, followed by Europe and North America, etc. BAE Systems, Thales, Rockwell Collins, Moog and Honeywell are the top 5 manufacturers of industry, and they had about 65% combined market share.
