Abstracts

A Flight Termination System (FTS) consists of the components onboard a vehicle that provide the ability to end that vehicle's flight in a controlled manner. The FTS is composed of an air and ground segment (FTS-Air and FTS-Ground). The FTS-Air is the onboard segment in charge of recovering the normal flight attitude of the RPAS and in charge of monitoring the FMS status via its own datalink. The actions are commanded by the FTSGround segment which works independently from the RPAS Ground Control Station (GCS).
