## Abstracts

The global Floating Crane Barges market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Floating crane barges are also known as floating cranes. Inland river ports use non-self-propelled crane ships, usually on the deck of square ships, with different types of cranes, and then equipped with ship mooring equipment and living facilities. Small and medium-sized floating cranes generally use shore power supply. If it is self-propelled, a propulsion system needs to be installed.
