Floor grinding machine, or floor grinder, is a purpose-built machine that are used for grinding and polishing marble, granite, concrete and any other kind of floor. Machines that grind concrete floors are usually made to handle much more stress and will have more power to drive the unit as concrete has a much higher sliding friction than marble or granite which is also worked wet, therefore with less friction. In fact some types of marble will spark when it is ground dry, causing deep damage to the marble surface.

Asia-Pacific is the largest region of Floor Grinding Machine, with a market share about 45%, followed by North America and Europe, etc. Husqvarna, Xingyi Polishing and Bartell are the top 3 manufacturers of industry, and they had about 25% combined market share.
