Abstracts

The global Floor Grinding Robot market size is expected to reach $ 108 million by 2032, rising at a market growth of 7.8% CAGR during the forecast period (2026-2032).

In 2025, global sales of Floor Grinding Robots were approximately 2,200 units, with an average selling price of around US$28,000 per unit at the manufacturer level. Major manufacturers typically achieved gross margins of approximately 30%–40%.

A Floor Grinding Robot is a robotic construction machine designed for grinding, leveling, surface roughening, removal of old coatings, and polishing of hardened concrete, cement-based, and other hard flooring surfaces. The equipment typically consists of a self-propelled chassis, single-disc or multi-disc grinding system, motors and drive systems, dust extraction interface, wireless remote-control system, controller, and navigation, positioning, or environmental sensing modules. Diamond grinding tools and other abrasives are used to mechanically process the floor surface, correcting unevenness, removing laitance and existing coatings, adjusting surface roughness, or performing multi-stage grinding and polishing.

Upstream components of Floor Grinding Robots mainly include motors and drives, reduction mechanisms, diamond grinding tools, grinding disc assemblies, batteries or power supply systems, wheeled self-propelled mechanisms, dust extraction and collection systems, wireless remote controllers, LiDAR sensors, vision sensors, inertial navigation units, controllers, and structural components. Downstream applications mainly include industrial plants, underground parking garages, commercial buildings, transportation facilities, warehousing and logistics facilities, and other large-area hardened floor construction and renovation projects. As the construction and flooring industries place greater emphasis on reducing labor intensity and dust exposure while

improving grinding efficiency and consistency, floor grinding equipment is increasingly evolving from conventional manually operated machines toward remote-controlled, autonomous navigation, automatic path-planning, and unmanned continuous-operation systems.

Report Scope

This report studies the global Floor Grinding Robot production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Floor Grinding Robot and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Floor Grinding Robot that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Floor Grinding Robot total production and demand, 2021-2032, (Units)

Global Floor Grinding Robot total production value, 2021-2032, (USD Million)

Global Floor Grinding Robot production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)

Global Floor Grinding Robot consumption by region & country, CAGR, 2021-2032 & (Units)

U.S. VS China: Floor Grinding Robot domestic production, consumption, key domestic manufacturers and share

Global Floor Grinding Robot production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)

Global Floor Grinding Robot production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)

Global Floor Grinding Robot production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global Floor Grinding Robot market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Husqvarna, Superabrasive, Klindex, Schwamborn Gerätebau, Tyrolit Construction Sweden, HG Hyper Grinder, SASE Company, Dr. Schulze, Fujian Xingyi Intelligent Equipment, Foshan ORCAS Robot, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Floor Grinding Robot market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (Units) and average price (US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
