Abstracts

The global Floor Patching Compound market size is expected to reach \$ 719 million by 2030, rising at a market growth of 6.0% CAGR during the forecast period (2024-2030).

Growing Construction and Renovation Activities: The increasing construction and renovation activities, particularly in the residential and commercial sectors, are driving the demand for floor patching compounds. These compounds are used to repair and level floors before the installation of various floor coverings, such as tiles, hardwood, and carpet.
Preference for Self-Leveling Compounds: There is a growing preference for self-leveling floor patching compounds due to their ease of application and ability to provide a smooth and level surface. Self-leveling compounds are widely used in commercial and industrial settings where flat and even floors are essential.
Focus on Sustainable and Green Building Materials: With the growing emphasis on sustainability and environmental consciousness, there is a trend towards using eco-friendly floor patching compounds. Manufacturers are developing products that are low in volatile organic compounds (VOCs) and environmentally friendly.
