Abstracts

The global Flu Vaccine market size is expected to reach \$ 11570 million by 2029, rising at a market growth of 5.3% CAGR during the forecast period (2023-2029).

Global key players of Vaccine for Influenza include Sanofi, CSL and GSK, etc. The top five players hold a share about 75%. North America is the largest market, has a share about 50%.

Influenza vaccines, also known as flu shots, are vaccines that protect against influenza. A new version of the vaccine is developed twice a year as the influenza virus rapidly changes. Most provide modest to high protection against influenza; however, each year this varies. Evidence in adults over 65 years old is poor. They decrease the number of missed days of work by a half day on average. Vaccinating children may protect those around them.

This report studies the global Flu Vaccine production, demand, key manufacturers, and key regions.
