Abstracts

The global Flue & Chimney Pipes market size is expected to reach \$ 1125 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

The function of a chimney is to safely remove the products of combustion from a fireplace or appliance to outside of the building, without causing any danger to the occupants of the house. A chimney works because hot air rises and moves from high to low pressure. Factors such as running the appliance at a very slow rate or cold air leaking into the flue will cool the gases and affect the performance of the chimney. Flue & chimney pipes are accessories for chimney systems.

Currently, Schiedel, Selkirk, DuraVent, Ubbink Centrotherm Group and Jeremias International are major manufacturers of this industry. Schiedel is a global leader. Schiedel held a share of 18%. In the North American market, Selkirk and DuraVent have a good reputation and occupy an absolute market share. In the European market, Schiedel, Ubbink Centrotherm Group, Jeremias International and Cordivari are the market leader.
