Fluoropolymer PVDF Extrusion Film is a functional thermoplastic film produced by melting and extruding polyvinylidene fluoride resin. It provides chemical resistance, weatherability, electrical insulation, mechanical strength and surface protection. Products include transparent, colored, modified and multilayer PVDF films. The scope excludes PVDF resin powder, solution-cast films, coatings, membranes, pipes, sheets substantially thicker than film products and finished components made from PVDF film.

The industrial chain includes upstream PVDF resin, pigments, processing aids, stabilizers, functional additives and release materials. Midstream covers resin blending, melt extrusion, film casting or blowing, orientation, surface treatment, lamination, slitting and quality inspection. Downstream applications include photovoltaic modules, architectural surfaces, chemical equipment, electrical insulation, batteries, aerospace components, automotive parts and industrial protective laminates.
