Fluoropolymer paints are paints with fluoropolymer as the main ingredient. Fluoropolymers have extremely high weatherability, chemical resistance, and abrasion resistance, and exhibit very good characteristics as a coating material. For this reason, they are widely used for surface protection of buildings and automobiles, which require high quality.

Applied to metal and concrete surfaces, it protects the surfaces and prevents deterioration caused by chemical substances and climatic changes, as well as stains caused by pollutants. Another feature of this product is its low adhesiveness, which makes it stain-resistant and easy to clean.
