Abstracts

The global Fluororubber market size is expected to reach \$ 1758 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Fluororubber (FKM/FPM) is a synthetic rubber (elastomer) made from fluorinated polymers. It is commonly called fluoroelastomer and is best known under the trade name Viton® (developed by DuPont in the 1950s).

In 2024, global Fluororubber sales volume reached approximately 61.2 k tons, with an average global market price of around 20.35

k US\$ per ton. Fluororubber product gross margin was about 22%, while the equipment production capacity was about 300 tons.

The automotive sector is the largest consumer of fluororubber, and several trends are accelerating demand:

Fuel system compatibility: Fluororubber's superior resistance to gasoline, diesel, ethanol blends, and biofuels makes it indispensable for O-rings, seals, gaskets, and hoses. With stricter emission standards and the growing use of ethanol-blended fuels, conventional rubbers fail more quickly, reinforcing the shift to FKM.

Turbocharged and downsized engines: The trend toward high-performance, smaller engines operating at higher temperatures creates a need for sealing materials that withstand 200–250 °C, an area where fluororubber excels.

Electric and hybrid vehicles: EVs and HEVs use FKM in battery seals, thermal

management systems, and coolant-resistant components, providing new growth opportunities beyond traditional fuel systems.

In aerospace applications, safety and reliability are non-negotiable. Fluororubber is widely used in hydraulic systems, fuel handling, gaskets, and O-rings due to its resistance to jet fuels, hydraulic fluids, and high-altitude ozone exposure.

Increasing global aircraft production and demand for fuel-efficient planes are driving consumption.

The rise of space exploration programs and private space companies also requires advanced sealing solutions, adding to market demand.

This report studies the global Fluororubber production, demand, key manufacturers, and key regions.
