Abstracts

The global Fluorosilicone Elastomer (FVMQ) market size is expected to reach \$ 454 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Fluorosilicone elastomer is a modified version of silicone rubber that has been fluorinated to 'cap off' the polymer chains to improve its chemical resistance. Fluorosilicone rubber is widely used in aerospace applications where fuels, coolants and oils may be present. These same fluids would cause standard silicone rubber and most other products to deteriorate. Fluorosilicone products also have very good low temperature and high temperature properties and are inherently UV and ozone resistant.

Global major companies profiled in the Fluorosilicone Elastomer (FVMQ) market include Dow, Momentive, Shin-Etsu Chemical, etc. Global top 3 companies account for over 80% of market share.

North America and Europe are likely to offer good prospects, both have a share about 72%.

In terms of product, Solid and Semisolid FVMQ is the largest segment, with a share over 60%. And in terms of application, the largest application is Automotive, followed by Aerospace, etc.

This report studies the global Fluorosilicone Elastomer (FVMQ) production, demand, key manufacturers, and key regions.
