Fluted Baking Cup is a type of disposable or reusable cup used to hold and shape batter or dough during baking, typically for cupcakes, muffins, or other individual-sized baked goods. Characterized by its pleated or 'fluted' walls, this design not only provides an attractive appearance but also enhances structural integrity and heat distribution during baking. Fluted baking cups are made from materials such as grease-proof paper, foil, silicone, or biodegradable composites, and come in a wide range of sizes, colors, and decorative patterns to meet both functional and aesthetic needs in home and commercial kitchens. The cups act as a protective barrier between the batter and the baking pan, ensuring easy release, consistent shapes, and reduced cleanup. In addition, they support hygiene and handling convenience, especially in food service environments. High-quality fluted baking cups can withstand high oven temperatures and resist oil and moisture penetration, preserving product presentation.
