According to our (Global Info Research) latest study, the global Flux-Cored Self-Shielded Wires market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Flux-cored self-shielded wire is a type of welding consumable used in various welding processes, such as gasless flux-cored arc welding (FCAW) or self-shielded flux-cored arc welding (SMAW). It is a tubular wire with a flux core that shields the weld puddle from the atmosphere, eliminating the need for external shielding gases like those used in traditional gas metal arc welding (GMAW). Flux-cored self-shielded wire is commonly used for welding applications in outdoor or windy conditions, as it is less susceptible to atmospheric contamination.
