Foam sound insulation board is a kind of sound insulation material board made of polyurethane, polystyrene (EPS), polypropylene (PP) and other foam materials, also known as foam sound insulation board. The main function of the foam sound insulation board is to isolate sound, which has good sound insulation performance and can reduce the transmission and reflection of indoor and outdoor sound. The foam material itself is light in structure, and the material is relatively soft, which can effectively absorb sound. At the same time, the foam sound insulation board has a certain thermal insulation performance, which can reduce energy loss to a certain extent.
