## Abstracts

The global Folder Gluer Machine market size is expected to reach \$ 500 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

The application of the folder gluer machine is the final process of the packing box in the packaging and printing industry. The process involves folding and sticking printed, die-forming cardboard. Folder Gluer Machine instead of manual gluing, reducing labor costs and improving efficiency.

The growth of the folder gluer market is primarily driven by automation trends in the packaging industry and rising environmental demands. The rapid expansion of e-commerce and consumer goods sectors has spurred demand for high-speed, high-precision machines to boost productivity and reduce labor costs. Meanwhile, stricter global environmental regulations are pushing folder gluer technology toward energy efficiency and compatibility with biodegradable materials, prompting manufacturers to develop more sustainable solutions.

The future of folder gluer machines will be shaped by smartization and versatility. On one hand, IoT and AI integration will enable remote monitoring and predictive maintenance, significantly improving operational efficiency. On the other hand, modular designs are becoming mainstream, allowing single machines to handle complex box types (e.g., hexagonal or custom shapes), particularly meeting the needs of high-value industries like luxury goods and pharmaceuticals.
