Abstracts

The global Folding Arm Loader market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Folding arm loaders are heavy equipment used in the construction and mining industries to handle and load materials such as soil, rock, gravel, and debris. It is also commonly referred to as a knuckle arm loader or an articulated loader. Unlike traditional loaders with rigid lifting arms, folding arm loaders have hydraulic lifting arms composed of multiple parts that can be folded or bent at different angles. This makes it easier to maneuver and cross obstacles in narrow spaces. The arms of the loader are also equipped with buckets or other accessories for handling materials.
