Abstracts

Folic Acid, also called vitamin B9, is a type of water-soluble B vitamin that is naturally present in some foods, added to others, and available as a dietary supplement.

Scope of the Report:

This report focuses on the Folic Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Folic Acid industry concentration is very high; there are several manufacturers in the world, and located in Europe and China.

Shandong Sinobioway is the Niutang players, it takes about 1/4 of the global market production, but for sales revenue, BASF take a market share of around 25% due to its product are only DC grade, which price is far higher than other ones.

In the current folic acid production process, synthetic routes within the industry are basically the same, the difference is mainly reflected in two areas: how to reduce pollution and improve yield. So the prices of different players in China are very closed.

In the applications, animal feeding is a majority ones, it takes around 3/4 of the total sales, but its growth rate can not match up with the food and medical ones.

The key consumption markets locate at Europe, Americas and China. The Europe takes the market share of 32%, followed by North America with 29%, China with 20%.

The worldwide market for Folic Acid is expected to grow at a CAGR of roughly 4.8% over the next five years, will reach 170 million US\$ in 2023, from 130 million US\$ in 2017, according to a new GIR (Global Info Research) study.
