Scope of the Report:

This report focuses on the Food Diagnostic Equipment and Consumables in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The reagents segment accounted for the major shares in this market. The availability of reagents for each specific analysis. Additionally, increasing food safety reagents detect high-interest parameters related to labeling, toxins, additives, and sugars. Therefore, due to the repeated use, wide applicability, and easy handling and transport, the demand for reagents is expected to grow during the forecast period.

The PCR systems contributes the highest revenue due to increased adoption of PCR systems by small F&B companies. The increasing of manufacturing of advanced probes in molecular biology, these tests generate specific results. The automation of PCR systems has reduced the time required to complete the test. Therefore, due to the high specificity and output obtained from PCR systems, has led to the increase in growth.

The worldwide market for Food Diagnostic Equipment and Consumables is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
