Abstracts

The global Food Dryer market size is expected to reach \$ 2785 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

Food Dryer is defined as a machine of heat under controlled conditions, to remove the water present in foods by evaporation to yield solid products. It differs from evaporation, which yields concentrated liquid products. The main purpose of drying is to extend the shelf-life of foods by reducing their in-water activity. Micro-organisms which cause food spoilage and decay and many of the enzymes which promote undesired changes in the chemical composition of the food are unable to grow, multiply or function in the absence of sufficient water.

Buhler, GEA Group , Andritz, Tetra Pak and SPX FLOW are the leaders of the Food Dryer industry, which take about 25% market share. Asia-Pacific is the major region of the global market, which takes about 45% market share.

This report studies the global Food Dryer production, demand, key manufacturers, and key regions.
