According to our (Global Info Research) latest study, the global Food Dryer market size was valued at US\$ 2032 million in 2024 and is forecast to a readjusted size of USD 2683 million by 2031 with a CAGR of 4.1% during review period.

Food Dryer is defined as a machine of heat under controlled conditions, to remove the water present in foods by evaporation to yield solid products. It differs from evaporation, which yields concentrated liquid products. The main purpose of drying is to extend the shelf-life of foods by reducing their in-water activity. Micro-organisms which cause food spoilage and decay and many of the enzymes which promote undesired changes in the chemical composition of the food are unable to grow, multiply or function in the absence of sufficient water.

Buhler, GEA Group , Andritz, Tetra Pak and SPX FLOW are the leaders of the Food Dryer industry, which take about 25% market share. Asia-Pacific is the major region of the global market, which takes about 45% market share.
