Abstracts

The global Food Expiration Date Tracker market size is expected to reach \$ 3031 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

To address the issues of food waste and food safety hazards caused by poor management or forgetfulness during food storage, food expiration trackers were developed. Since the rise of IoT and smart home technologies in the early 21st century, the home food management field has seen significant development. Currently, food expiration trackers have evolved into various types, including smart electronic tags, mobile management applications, built-in refrigerator systems, and cloud data synchronization. They are widely used in home kitchens, catering businesses, supermarket inventory management, and food logistics traceability. These smart devices can monitor food expiration dates in real time, automatically push consumption reminders and disposal suggestions, thereby effectively reducing food waste and improving food safety.

Food expiration trackers, through technological empowerment, reconstruct the entire 'farm-to-table' safety system, meeting both 'dual carbon' goals and consumer demand for transparency. In the future, with the deep integration of 5G and IoT and the maturity of AI dynamic prediction algorithms, this industry will evolve towards the dual goals of 'precise loss reduction + health management.' The global market size is projected to exceed \$50 billion by 2030, with China accounting for over 25%, making it the world's largest market for food traceability technology applications. The ultimate goal is to realize the vision of 'every food item is traceable, every bite is safe,' contributing Chinese solutions to global food safety and sustainable development.

This report studies the global Food Expiration Date Tracker demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Food Expiration Date Tracker, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Food Expiration Date Tracker that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Food Expiration Date Tracker total market, 2021-2032, (USD Million)

Global Food Expiration Date Tracker total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Food Expiration Date Tracker total market, key domestic companies, and share, (USD Million)

Global Food Expiration Date Tracker revenue by player, revenue and market share 2021-2026, (USD Million)

Global Food Expiration Date Tracker total market by Type, CAGR, 2021-2032, (USD Million)

Global Food Expiration Date Tracker total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Food Expiration Date Tracker market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include NoWaste, FoodKeeper, Kitche, Pantry Check, BEEP, Fridgely, CozZo, FridgeBuddy, Kiff, KitchenPal, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Food Expiration Date Tracker market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
