Abstracts

The global Food Grade Arabic Gum market size is expected to reach \$ 1390 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032). Food Grade Arabic Gum (Gum Acacia) is a natural hydrocolloid exudate primarily derived from Acacia trees, widely used in food and beverage formulations as an emulsifier, stabilizer, thickener, and encapsulation carrier. In 2025, the average global price of food grade Arabic gum is approximately US\$4,200 per metric ton, with global sales volume reaching around 205,000 metric tons and production volume estimated at about 220,000 metric tons. The industry typically maintains a gross margin of 22%-38%, supported by functional performance in beverage emulsions, clean-label positioning, purification and standardization capability, and long-term supply contracts. The supply chain includes upstream harvesting and collection of raw gum, primary sorting, and logistics; midstream processors focus on cleaning, dissolution, filtration, spray drying, quality grading, and food safety compliance; downstream customers primarily include beverage producers, confectionery manufacturers, bakery and dairy brands, flavor houses, and ingredient distributors.

The market trend for food-grade Arabic gum is influenced by several factors. Here are some key trends: 1. Increasing demand for natural and clean-label ingredients:

Consumers are increasingly seeking natural and clean-label ingredients in their food and beverages. Arabic gum, also known as gum arabic or acacia gum, is a natural gum derived from the sap of the Acacia tree. It is known for its natural origin and clean-label appeal, making it popular in a wide range of food and beverage products. 2. Functional and textural properties: Arabic gum is valued for its functional properties, including its ability to stabilize emulsions, improve texture, and enhance mouthfeel. It is often used as a thickening agent, emulsifier, and film-forming agent in various food and beverage applications. The functional benefits of Arabic gum have contributed to its growing demand in the food industry.
