Food grade calcium L-threonate<sup>?</sup> is an organic calcium salt formed by the combination of L-threonate and calcium ions. It is a small molecule organic calcium. Compared with traditional inorganic calcium (such as calcium carbonate, calcium phosphate ), has higher bioavailability and better solubility, which allows calcium L-threonate to be absorbed and utilized faster in the human body, thereby reducing irritation to the gastrointestinal tract and improving the calcium supplement effect. ?. Calcium L-threonate is a white powder, almost odorless and tasteless, soluble in water, easily soluble in hot water, and insoluble in alcohol, ether and chloroform. These physical properties give it good stability and solubility in food processing.
